# PANRE

*Physician Assistant National Recertifying Exam*

<https://killexams.com/pass4sure/exam-detail/PANRE>

**Question: 60**

A patient comes to the office presenting with paroxysmal or sustained hypertension, severe headaches, palpitations, flushing, heat intolerance, and hyperglycemia. Further laboratory results reveal that the patient's levels of epinephrine and norepinephrine are excessive. Based on these findings, the patient is most likely diagnosed with:

- A. Hypothyroidism
- B. Hyperthyroidism
- C. Pheochromocytoma
- D. Addison's disease

**Answer: C**

Pheochromocytoma is a catecholamine-producing hormone, which is manifested by the increased levels of epinephrine and norepinephrine in the system. Without appropriate treatment, pheochromocytoma can cause hypertensive retinopathy, nephropathy, and cardiac enlargement, resulting in congestive heart failure.

**Question: 61**

Which of the following laboratory findings support the diagnosis of hypoparathyroidism?

- A. Serum calcium = 10.0 mg/dL; Serum potassium = 5.5 mg/dL
- B. Serum calcium = 8.7 mg/dL; Serum potassium = 3.0 mg/dL
- C. Serum calcium = 11.0 mg/dL; Serum phosphorus = 2.0 mg/dL
- D. Serum calcium = 7.5 mg/dL; Serum phosphorus = 5.5 mg/dL

**Answer:** D

A patient with hypoparathyroidism has hypocalcemia and hyperphosphatemia. The other options are not correct.

**Question:** 62

Which of the following is not a typical sign and symptom of renal cell carcinoma?

- A. Abdominal mass
- B. Hematuria
- C. Flank pain
- D. Oliguria

**Answer:** D

Renal cell carcinoma is the most common malignancy of the kidney. Renal tumors in the early stages are asymptomatic. A presentation of abdominal mass may indicate renal cell carcinoma. The symptoms of renal cell carcinoma include hematuria, flank pain, and palpable flank mass.

**Question:** 63

A patient is scheduled to undergo needle biopsy of the kidney. Which of the following is an important consideration before letting the patient undergo this procedure?

- A. Adequate fasting for at least 8 hours prior to procedure
- B. Establish an IV line for hydration
- C. Monitoring vital signs
- D. Ensure that coagulation studies have been carried out

**Answer:** D

Preparations must be done before the patient undergoes biopsy. The most important is the suspension of anticoagulant medications at least one week before the procedure. Anticoagulant studies should be carried out at least two weeks before the procedure. IV line, vital signs, and fasting are also important preparations, but ensuring that coagulation studies are normal is more significant.

**Question:** 64

The Bartholin gland is responsible for secreting mucus to lubricate the vagina. Where is it specifically located?

- A. Anterior wall of the vagina
- B. Above the urethral and vaginal opening
- C. Below and to the left and right of the vaginal opening
- D. Extends from the vulva to the cervix

**Answer:** C

The Bartholin gland is located below and to the left and right of the vaginal opening. Option A refers to the Skene's gland, option B refers to the clitoris, while option D refers to the vagina.

**Question:** 65

The clinical feature of interstitial cystitis includes all of the following, except:

- A. Continuous bladder pain
- B. Nocturia
- C. Frequent urinary urgency
- D. Bacterial infection

**Answer:** D

Interstitial cystitis is the inflammation of the bladder in the absence of bacterial infection. It is believed to be caused by an autoimmune process that alters the cells of the bladder lining. The disease is characterized by frequent urination, dysuria, nocturia, and continuous perineal, vaginal, or suprapubic pain.

# SAMPLE QUESTIONS

*These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.*

*Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:*

**Actual Exam Questions:** *Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.*

**Exam Dumps:** *Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.*

**Practice Tests:** *Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.*

**Guaranteed Success:** *Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.*

**Updated Content:** *Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.*

**Technical Support:** *Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.*
