QUESTION: 67

You are analyzing the performance data to avoid oversizing of a CI solution. What date and time frame should you use?

- A. Average production time over multiple days
- B. Peak production times over multiple days
- C. Average production time over a single day
- D. Peak production times over a single day

Answer: D

QUESTION: 68

In a cloud design, an architect has defined a separate trust zone for host management. The hosts will be running open source hypervisors. What should be included in the design deliverables to support this separate trust zone?

- A. Federated authentication source and preferred QoS network settings
- B. Isolated management network and a federated super-user account
- C. Separate PKI and encrypted CMP portal access
- D. Separate PKI and a separate authentication source

Answer: B

QUESTION: 69

As a cloud architect, you are designing a CI solution to ensure that you isolate specific workloads for security. What should you design for?

- A. High Availability
- B. Fault Tolerance
- C. Multi-tenancy
- D. Redundancy

Answer: B

QUESTION: 70

Which design consideration applies to object storage?

- A. Multi-tenancy is supported through file and directory permissions
- B. It is best suited for high performance and low latency applications
- C. A RAID controller on the host computer handles redundancy
- D. A common authentication mechanism is accessible by all tenants

Answer: B

QUESTION: 71

You are a cloud architect responsible for designing a multiple availability zone configuration for the organization's geographically dispersed clouds. You must provide the ability for services to survive a failure at the data center or site level. The primary requirement is to provide for automated site recovery. What is a key consideration for automating the setup, failover, and recovery of services at the remote site?

- A. When implementing automated site recovery, you must have automated orchestration of site failback processes
- B. The number of storage volumes in the DR site must be identical in number and size to the primary site.
- C. The recovery site must have sufficient available capacity to host workloads after a disaster at the primary site.
- D. The DR site must contain the same vendor hardware as the primary site.

Answer: C

QUESTION: 72

You are designing a cloud backup solution. Consider the following requirements when sizing the backup target:

- . Total amount of data to be backed up = 2 TB (2000 GB)
- . Full backup once a week
- . Retention period for full backups = 2 months
- . Daily incremental backups (assuming an average 10% change in data)
- . Retention period for incremental backups = 1 month
- . No Compression or deduplication
- . Number of backup copies = 1

What is the total capacity, in GB, required for the backup target to accommodate the backups?

- A. 13, 200
- B. 16, 000
- C. 21, 200
- D. 26, 400

Answer: C

QUESTION: 73

You are designing a cloud to support an Oracle OLTP environment. What is the recommended read/write ratio to use in this environment?

- A. 2 to 1
- B. 3 to 1
- C. 4 to 1
- D. 5 to 1

Answer: D

QUESTION: 74

An organization wants to deploy cloud applications using block storage. The architect has included a HCI solution in the cloud design. Which requirements must have led to including this solution in the design?

- A. Acquire additional storage array; Combine storage and application processing using a spine/leaf topology
- B. No additional storage arrays to be acquired; Separate storage processing from application processing

- C. No additional storage arrays to be acquired; Combine storage and application processing on each node
- D. Acquire additional storage array; Combine storage and application processing using a full mesh topology

Answer: A

SAMPLE QUESTIONS

*These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.*

Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:

Actual Exam Questions: *Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.*

Exam Dumps: *Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.*

Practice Tests: *Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.*

Guaranteed Success: *Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.*

Updated Content: *Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.*

Technical Support: *Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.*
